

## The B Wise Manufacturing Paint Proces

B Wise Manufacturing's superior paint finish stands out among the best in our industry. This system was fully automated in Fall 2017. Our step by step process includes:

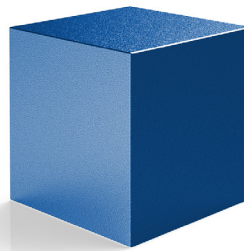

- Thorough prep and metal finishing process for maximum paint adhesion
- Entire trailer is degreased followed by a high pressure rinse
- Entire trailer is chemical washed followed by a clean rinse, and treated in a rust inhibiting zirconium bath
- Entire trailer has a protective powder primer, cured in a 400 degree oven\*
- Durable top powder coat finish, cured in a second 420 degree oven\*
